**The Zech Group Structure and Strategy**

A wide variety of services in six areas of operation adds up to a strong business group.

The Zech Group is a strategic management holding company incorporating six business units with their own actively operating controlling companies. These parent companies coordinate the work of the six business units, develop the overall strategy and formulate the global targets for further development of the entire business group. The sheer variety of services we offer make us a competent partner in the sectors Construction, Real Estate, Hotel, Environment/Technology, Industry and International.
